ABOUT

I am passionate about technology and software development. I love facing challenges and being constantly learning.

My goal is to be able to join a company in the future where I can apply my programming knowledge and business management skills to make a positive impact.

EXPERIENCES

FULL STACK WEB DEVELOPER - ENVONE

Envone | Sep 2022 - (current)

- Development of a management system for companies in the food industry
- Working every day with a team and learning new technologies & practices.
- Programming, implementation and maintenance of the app including frontend and backend with testing.
- Javascript, Node Js, Next Js, Cypress, Mocha, MySQL, Git, Scrum.

WEBSITE DESIGN AND DEVELOPMENT FOR A FURNISHED APARTMENT AGENCY

PalermoJai | Dec 2022 - (current)

- Implemented innovative ideas such as a section for specific client needs, and a online reservation system with automated confirmation and payment.
- In charge of the design, creation and management of the website of the apartment's building in Palermo implementing a booking engine.
- Managed social media to increase the company's online presence, with advertising campaigns and local influencer partnerships. I continue to contribute to the business's growth by improving the website's functionality and managing social media.

FULL STACK WEB DEVELOPER - PSICOAPP

Henry | Jun 2022 - Jul 2022

- PsicoApp is a web application that connects patients with psychologists from all over Argentina remotely, being able to create and log in as a patient or psychologist, schedule and pay appointments with psychologists and even chat live with them.
- Participated on the design and development of the complete application. This experience helped me to develop: team working, problem solving, leadership.
